ICMR have established a Task Force on Asthma wherein several schemes to study the etiopathogenesis of asthma are being initiated.

Amendment in Drugs and Cosmetics Act relating to blood donation by prisoners

2310. PROF. M. SANKARALINGAM: Will the Minister of HEALTH AND FAMILY WELFARE be pleased to state:

(a) whether it is a fact that an amendment was made in the Drugs and Cosmetics Act by his Ministry about two years ago banning donation of blood by prisoners, drug addicts and people having multiple sexual partners;

(b) if so, how can blood donation by Tihar prisoners be supported;

(c) whether it is also a fact that NHRC and Indian Red Cross Society rejected the blood donation by prisoners; and

(d) if so, the reasons behind such a rejection?

THE MINISTER OF STATE IN THE MINISTRY OF HEALTH AND FAMILY WELFARE (SHRI A. RAJA): (a) to (d) Yes, Sir. The provisions of Drugs & Cosmetics Act 1945 as amended on 5th April, 1999 prohibits collection of blood from jail inmates, drug addicts and people having multiple sexual partners. This is one of the conditions laid down for donation of blood and is aimed at ensuring highest standards of safety in Blood Transfusion Services.

It is well known fact from studies conducted in India and all over the world that prison inmates have much higher levels of HIV infection, Sexually Transmitted Infection prevalence, Drug abuse practices and other risk behaviours, when compared to the general population. Although, all blood units collected are tested for blood borne infections, the phenomenon of 'window period' where infections in their early stages are not detectable by the tests used, makes the process of proper donor selection crucial.

Keeping in view the above mentioned legislation and the reasons behind prohibiting collection of blood from jail inmates, the Indian Red Cross Society has rejected proposals for organising Blood Donation Camps in Prisons.
